Senior Frontend Developer

Summary

I'm an extroverted, energetic, highly positive and hardworking developer with +8 years expertises in web development (frontend) with a history of graphics knowledge.

My main affection is to learn about web and new technologies from various sources. I enjoy encountering challenges for which my problem solving ability manifests and expands. I love to see beautiful codes that have an adherence to standards and open-source solutions. I try to figure out all possible solutions but then act based on best practices and standard ways.
