Senior Frontend Developer

Summary

I'm an extroverted, energetic, highly positive and hardworking developer with +8 years experiences in web development (reactjs and vuejs in JavaScript).

My main affection is to learn about web and new technologies from various sources of people. I enjoy encountering challenges for which my problem solving ability manifests and expands. I love to see beautiful codes that have an adherence to standards and open-source solutions. I try to figure out all possible solutions but then act based on best practices and standard ways.

Skills

Vue.js

Nuxt.js as SSR, Vuex, Typescript

React.js

Next.js as SSR, Redux, Typescript, Gatsby
